## ❶How much solar fits on India's farmland and keeps 80% of the harvest?

## ❷Simulate shade → harvest

harvest (% of open field)

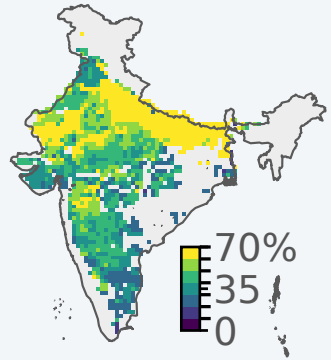

panel cover: sparse → dense

every 0.25° cell · 5 climate models

## ❸Answer for India

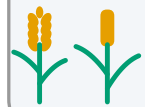

max panel cover keeping 80% harvest

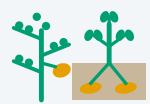

**45.5 TWp**

would generate ≈ 48× India's yearly electricity use **(upper bound)**
2050 (SSP5-8.5): −1% vs 1995–2014

max panel cover:

**~61%** cereals

**~29%** legumes
