❶ How much solar fits on India's farmland and keeps 80% of the harvest?

❷ Simulate shade → harvest

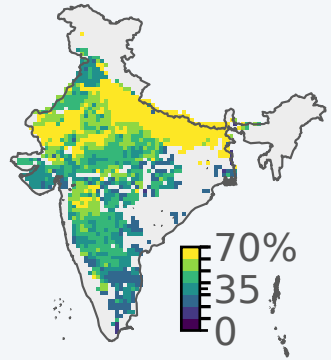

every 0.25° cell · 5 climate models

❸ Answer for India

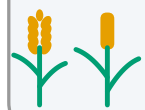

max panel cover keeping 80% harvest

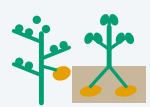

45.5 TWp

would generate ≈ 48× India's yearly electricity use **(upper bound)**
2050 (SSP5-8.5): [±X]% vs 1995–2014

max panel cover:

~61% cereals

~29% legumes
