# How much solar can India's farmland host and still keep 80% of each harvest?

## METHOD

**Light model**
shade on crops, 3 panel layouts

→

**Crop model**
DSSAT, 4 crops, 5 climate models

→

**Yield rule**
densest panels still keeping 80%

## KEY FINDINGS

### HOW MUCH?

**22.6–39.2**

TWp, technical potential

**Bounds, no forecast**

### HOW DENSE?

**52%** cereals | **29%** legumes

of each field under panels

**Limit set by crop**

### BY 2050?

**−1%**

capacity change vs today, SSP5-8.5

**Small change**
